## **Terrain information**

### **Truuta**

The first mapping of the terrain. Fieldwork was done between 2015-2016. The height difference on the terrain is 40 m, on one slope 20 m and the terrain is dominated by many small swamps. The forest is mostly coniferous. The runnability varies from poor to good. There is a network of tracks and paths of medium density.

### **Juusa**

Juusa is a terrain west of Otepää. The contour forms are mainly large. One part of the map is Juusa hill with a relative height difference of 50m with many re-entrants and erosion gullies. The other part of the map consists of many slopes and swamps of different sizes. The forest type is mainly coniferous or mixed. The runnability of the forest is from very poor to good. There is a network of tracks and paths of medium density. Part of the terrain was mapped in 2017 and the other part was corrected in 2017.

## **Start**

Individual start every day by previously randomly selected starting order. Two-minute prestart. Each runner's SI-card gets checked two minutes before the start by the organizers. One minute before the start, competitors go to stand next to their class' map-bucket. After start signal, the competitors may take their map and start their race. A marked trail goes from start to starting triangle. Passing the starting triangle is compulsory. Control legends for each course are available in starts 1 and 2. Warm-up clothing left to starts are brought back to the event centre by the organizers.

## **Finish**

Time will be registered by punching the control on the finish line. Competitors who had to mechanically punch the controls, need to show these markings on their map to the organizers. People, who rented their SI-cards from the organizers, need to return these on the last day right after their results are read from the card at the finish line. Each competitor gets a paper with their SI-card results after leaving the finish area. Competitors who have quit their race, need to pass the finish line. If that is not possible, information desk in the event centre needs to be notified with the competitors name. All maps are gathered until the end of the starts.
