Welcome

After the incredible experience of hosting JWOC 2005 in the Ticino we are now getting ready for a new adventure. We are very pleased to welcoming participants, trainers and supporters who will visit our region in 2018 for the European Championships (EOC2018) and the EGK Swiss 5-days orienteering event.

Being part of World Cup Round 1, the organisation of EOC2018 is a challenge we took upon ourselves with commitment and enthusiasm in order to guarantee a successful sports event. What to expect from this exciting week? It is a unique experience for the athletes, which will challenge them by running through the beautiful woods and the typical narrow streets of our region. It is also a unique opportunity for the public to experience the magic of orienteering up-close.

Ticino is not only a lovely region for orienteering, it is also an area to visit and taste its culinary specialties: there are many fascinating places and some of them can also be found in the competition areas where you will be able to try local delicacies.

We really hope that athletes and orienteering "aficionados" from all parts of the world will enjoy their stay in our region and that they might come back to visit the Ticino someday again.

A special thank you goes to the many volunteers that have been working for months in the organisation of EOC2018. Furthermore, the Organising Committee would like to sincerely thank all the sponsors and the authorities of each municipality that will be hosting the competitions. Thank you for your active and constant support!

Tourism

The Canton of Ticino offers a lot of sport, but also a lot of touristic highlights. For ten days, the Ticino will attract the attention of the regional, national and international media. It will be an important occasion not only to share our great orienteering passion, but also to admire the beauties of the landscape with its mountains, lakes, streams, castles and typical villages... the wonders of Ticino are really many and all can be explored!

Gastronomy

The Ticino is particularly privileged from a gastronomic point of view as it honours culinary traditions and has been rewarded as such that many of its excellent restaurants have been top-ranked in the most important gastronomic guides.

Culture

Culture and its different expressions play an important role in Ticino's global image. It is not surprising, therefore, that in the last decade the Canton has devoted huge resources to this sector.

Tracking devices

Tracking devices will be used for viewing the competitions on the large video screen in the event arenas, for live transmission, and as part of the TV production.

The electronic tracking device is carried on the back of the runner in an elastic harness. Tracking will be offered at each competition except sprint qualification.

There will be 100 tracking devices assigned by the organisation.

In each quarantine there will be a list of athletes eligible to carry a tracking device.

Personal harness will be handed out by the organiser at accreditation time. Runners can use the harness provided by the organiser or a personal one.

Tracking devices will be placed into the harness by an official at the pre-start and collected at the finish.

Please remember wear your harness if you are eligible to carry a tracking device!

Transport

There is a mandatory transport for the three individual forest competitions.

Transport of the athletes to the pre-start is by means of minibuses at scheduled times according to competitors' start numbers.

The transport for coaches is usually separate from the athletes. The mini-buses for the coaches will leave when they are full. Please check the specific transport schedules for coaches in the transport-tables.

The sequence of the bus stops is quarantine → pre-start → arena.

Start procedure

The competitor's name and bib number is called at the pre-start. It is the competitor's responsibility to watch for his/ her start time. There is also a clock showing competition time in the pre-start area. There will be clocks on the start line showing competition time.

Units for clearing and checking SI-cards are situated at the exit of the pre-start of the individual races or at the entry to the change-over area of relays. It is the athletes' responsibility to clear and check their SI-card correctly.

At all individual starts, the competitors pick up the control description at minute -3 from a table. Control description is always printed on the competition maps.

At all individual starts, the maps will be placed face down on a table next to the start line. An official releases the competitor by taking his hand off his/her shoulder at the start time.

At relay starts, the map of the first leg can be picked up from the ground at the start signal.

For the following legs, the athletes pick up their map when entering the change-over zone. The map can not be opened until the change-over has happened.

The start triangle is marked in the terrain by a control flag. The route to this flag is marked with tape and competitors must follow this marked route to the start point.

Finish procedure

Time will be measured at the moment of crossing the finish line.

After crossing the finish line, athletes may be requested to take immediately place on the leader chair. In this case a team official may hand over a jacket or some other clothes to an organizer, which will bring them to the runner to be worn. Change of clothes is not allowed as the athlete is live on TV.

The leader can follow the race on a TV-screen, and may only leave the stage according to the instructions of the organizer.

In all other cases, after the finish line the athlete enters an area of restricted-access for SI-card downloads and removal of tracking units. Coaches are allowed and drinks are available as well as access to first aid if needed. Athletes selected for anti-doping testing will be met here by their chaperones.

Anti-doping

Doping is strictly forbidden, and the organisers of EOC2018 are dedicated to support the anti-doping authorities in their work. Doping controls may be carried out any time during the competition period in accordance with the procedures described in the WADA International Standard of testing.

The IOF Anti-Doping Code and rules and the World Anti-Doping Code 2015 apply as of 1st January 2015. Athletes who are selected for the doping tests must bring an official identification (with photo) to the doping test area. The athlete should also bring along their therapeutic use exemption (TUE) if applicable.

In general, it is advisable that athletes bring along their ID to all competitions and events.

For more information, please consult:

<http://orienteering.org/anti-doping/>

The Physiotherapists speaks fluently Italian, English, German and French. On weekends and Ascension Thursday, the physiotherapist can be reached at +41 79 412 66 45.

Insurance against accidents is the responsibility of the federation or the individual competitor according to their national regulations. Competitors participate at their own risk (including the warm-up) and assume their own safety precautions. They will be held responsible for all injuries that might occur during EOC 2018.

Complaints

Final results will be available in paper form in the competitor's area and announced by the speaker.

Any complaint shall be made in written form and handed over to the organisers at the arena event office as soon as possible. A special form is available at the event office (in the event centre or in the arenas). Complaints regarding the results shall be made no later than 15 minutes after publication of the official results list.

A written protest can be made against the organiser's decision about a complaint. Written protests shall be delivered personally to a jury member or to the IOF senior event advisor no later than 15 minutes after the organisers have announced the decision about the complaint.

A protest has to be accompanied by a payment of 50 EUR, refundable in case the protest is accepted.

Coaching area

In arenas with an athlete's passage along the course there is an area reserved for coaches.

Only two coaches per nation are allowed at the same time.

- In the long distance competition the qualification criteria is based on national quotas for Men and Women as follows:

 - For any other federation having at least 3 competitors in the top 200 of the World Ranking: 3 competitors per federation are allowed to participate;
 - For all other federations: 2 competitors per federation are allowed to participate;
 - Personal place for the current European Champions (W/M) in long distance;
 - The home country is allowed to have at least 4 athletes in each class;

 - Competitors who do not fall on previous rules will have the possibility to enter the public race (EGK Swiss 5-days event), which takes place on the same day (in elite class, by paying the regular fee).
- In the sprint relay each federation may enter one team, consisting of 4 competitors (of which at least 2 must be women). Incomplete teams and teams with runners from more than one federation are not allowed to compete.
- Each participating federation shall appoint a team manager to act as a contact person between the team and the organiser. It is the team manager's duty to check that the team receives all necessary information.

The race will be broadcasted live by Swiss Television. TV-staff may be close to several controls. A cameraman might even follow an athlete for a few meters.

Those marked as "passages" will surely be open; other gates and doors are marked on the map with a thick black line and may or may not be open, thus being more or less visible to the runners depending on the situation (see foto).

Notes:

At the refreshments the organiser will provide water and sport drinks. Refreshments located at a control will be marked on the control description, while refreshments located along a route will be marked on the map.

Personal drinks can be carried out to the first refreshment point, providing they are delivered to the organiser at the exit of the quarantine no later than 08:45 with the start number written on it.

There are a few natural protection areas (marshes) which are marked on the map but not in the terrain.

Please respect them, trespassing will be monitored.

There are also some forbidden areas marked on the map and in the terrain (red-white ribbons) as usual.

Permanent controls such as the ones shown below can be found in the forest. They should be ignored even if they happen to be at the same location as the EOC-controls.

The race will be broadcasted live by Swiss Television. TV-staff may be close to several controls. A cameraman might even follow an athlete for a few meters.
