### **Assistants**

There will be no need of essential assistants at each course. Paths are of very good quality and the elevation will be minor. We expect to have some assistants at a bit difficult course places (steep downhill and narrow places). We will be grateful for your early information on assistant needs. Competitor's own assistants are permitted.

## **Terrain and maps**

The terrain is quite similar to WTOC2018 (Latvia, Daugavpils) terrain. It will be good possibility to have good practice before WTOC starts!

No TrailO competitions held before at this terrain. All courses at mature pine forest with good visibility and many contour objects. Most trails with firm surface.

All maps: ISSOM 2007, 1:4000, contour interval 2,0m, size A4, waterproof, mapped at April-May 2018 by Andrius Jovaiša. Laser scan contours (0.5m) are used in mapping process and will be visible at solution maps.

Only features with height more than 1 meter are mapped. In some cases clearly visible landforms with less than 1 meter can be mapped.

Black cross (ISSOM 540) in most cases represent information posts and boards.

Benches are mapped with special symbol: gray rectangle with real orientation (you can see them at map samples above).

In some places (green on yellow) there are no dots representing distinct vegetation boundary (ISSOM 416) for better map reading.

Some special mapping:

2<sup>nd</sup> day TempO 3<sup>rd</sup> station:

Sandy tracks near beach is Mapped as yellow lines.

# **Punching**

Electronic punching using SI (SPORTident) units. Competitors can use their own SI cards. It will be available to rent SI card at start place (2€ one course or 5€ the whole event).

#### Zero tolerance

Zero answer is possible if the flag is set at least 5 meters away from the correct position. When setting out flags and determining the correct point we will use 6 meters distance to avoid uncertainty.

No Zero answers for 'between' descriptions using the wrong line, distance, or deviation and the 5 meters rule is valid.

No Zero answers for a flags on a point feature using wrong angle.
