Event Center

Terrain

27.05.2023

Predominantly well and very well runnability pine forest with a well structured landscape. But there are also flatter and denser areas. The share of poorer runnability and visibility landscape is more in the shorter distances. There are many different types of holes and ditches. The smaller ones are not mapped. The bogs and swamps between the mineral fields are wet. The further south the wetter. The landscape becomes less accessible from east to west. The highest slope is 25m.

28.05.2023

Compared to Long distance, the landscape is more articulated with denser vegetation. Highest slope 35m. There are even more holes and ditches. There are no ugly bush areas. There are pinetree young growth areas and a juniper underwood. Of the latter, the denser areas are mapped with sign 406 - vegetation: slow running. In the case of juniper underwood, the transitions between 405 - Forest and 406 are not clearly discernible. There are few bogs and swamps to cross.

Additional info

27.05 from the event centre to the start is 300m. Prestart is 3 min.

There is restricted area marked on the map but not marked on the terrain.

Refreshment points are in the CP and on the paths crossing the terrain.

Only water will be available in refreshing points.

Additional CP descriptions maximum size is 5 x 20 cm and are available in pre-start

CP's are in the pits unless the CP decription says otherwise!

NB! Important info about relay maps

For the sake of the map clarity there are no

- Marking from the start to the K-point. Distance from start to K point is 90m.
- Marking from the last control point to the finish - this is 160m.
