## Terrain description

Mountain forest 700-1100 m above sea level. Mainly open pine and birch forest with a lot of small and bigger marshes. Lower areas and hillsides also with spruce. In general very good runnability and visibility. Some smaller areas with reduced runnability and visibility due to undergrowth, thicker forest and rocks. Varying technical challenges from areas with smooth contours and few details to areas with complex contours and many map details. Some old man-made features like reminders of old, small mountain farms. A few smaller areas with a lot of newer mountain cabins and gravel roads. Part of the terrain has cross-country ski tracks and alpine ski slopes.

**“A wonderful terrain! You won’t forget this!”** Anders Nordberg, Triple NOC winner 2005 and WOC medallist

### Embargoed areas and training in the area

With reference to the IOF Competition Rules, the area between Rauland Høyfjellshotel and the lakes is embargoed, see map and web for details. For the sprint distance, urban areas in Åmot are restricted. Potential team members, leaders and others, whose knowledge of the terrain could influence results of the JWOC competition, are prohibited from entering these areas. However, public roads passing through the areas may be used. The restrictions are also valid for ski tracks in the area during winter time. See detailed restriction at the web-page.

Some areas are already opened for training, and more will be opened at later stages. See map and web for details. Old maps in the area are available at the web (non-printable versions). Printed versions offered for sale.
